PRECISION METHODS TO REDUCE LAMENESS IN CATTLE

SCOTGRASS 2019

Worried about the occurrence of lameness in your herd?

Lameness can be caused by digital dermatitis an ulcerative lesion. Standard farm treatment usually only of obvious lesions, not the problem in the whole herd. Regular treatment is often expensive with a risk to the animal.

Join Us on the SRUC Stand

ScotGrass Wed 15th May 2019

Crichton Royal Farm

Short 15 minute workshops will demonstrate a new innovative precision treatment with improved foot-bathing that reduces the incidence of lameness
